Order of Subject Area Presentation
The order in which subjects are presented in the Outline is the recommended order. Instructors and Education Providers may make reasonable adjustments in the order of presentation but should retain a logical order of presentation.

Recommended subject area emphasis by major subject area (i.e., preceded by a Roman numeral) has been provided in this syllabus in the form of recommended number of instructional hours to be devoted to each major subject area. Reasonable minor adjustments in emphasis may be made to suit course schedules and instructional approach; however, caution is given against undue overemphasis or underemphasis of topics.
Course Hours and Delivery Method
The Prelicensing Course must consist of a minimum of 75 instructional hours, although approved Education Providers may, at their option, schedule the course for more than 75 hours. The course may be offered via in-person, synchronous distance, distance, or blended delivery. Pre-approval is required for all types of delivery.

Instructional Levels
The Commission utilizes Instructional Levels to prescribe the scope and depth of coverage of topics and subtopics throughout the course. There are three levels, with Level 1 being the lowest and Level 3 being the highest level of instruction. Instructional Levels are based on Bloom’s Taxonomy.

Below are the definitions of the three Instructional Levels, including the prescribed competency and instruction for each. Competency means what students will be able to do by the end of topic/subtopic coverage. Instruction means the prescribed depth of coverage and instructional methods.

Level 1 – Recall
NOTE: Level 1 is based on Blooms Taxonomy Level 1-Understand and Level 2-Remember.

Competency: Students should be able to recall facts and basic concepts and to explain ideas or concepts. Learning objectives may include terms such as define, duplicate, classify, explain, and describe.

Instruction: Instructor should review and discuss basic definitions, facts, concepts, procedures, etc. In-depth instruction is not required.

Level 2 – Application
NOTE: Level 2 is based on Blooms Taxonomy Level 3-Apply and Level 4-Analyze.

Competency: Students should be able to use information in new situations and to draw connections among ideas. Learning objectives may include terms such as implement, solve, demonstrate, interpret, differentiate, relate, compare, and contrast.

Instruction: Instructor should review and discuss the topic in moderate depth sufficient to illustrate and enhance understanding of facts, principles, procedures, etc. and their relevance to brokerage practice.
Level 3 – Analysis

NOTE: Level 3 is based on Blooms Taxonomy Level 5-Evaluate and Level 6-Create.

Competency: Students should be able to justify a stand or decision and to produce new or original work based on the information. Learning objectives may include terms such as defend, judge, critique, weigh, design, assemble, develop, or formulate.

Instruction: Instructor should review and discuss the topic in substantial depth, using examples to reinforce understanding of ideas, principles and practices, and requiring students to complete practical work assignments to demonstrate both their understanding of the topic and their ability to apply their knowledge to common fact situations that will be encountered in real estate practice.

Each major topic (i.e., preceded by a capital letter) in this syllabus has been assigned an Instructional Level. In some instances where a subtopic should be afforded significantly greater or lesser emphasis than the major topic under which it is listed, that subtopic has been assigned a different Instructional Level that applies to that subtopic only.

Education Providers and instructors are REQUIRED to comply with the assigned Instructional Levels when teaching this course.

Real Estate Mathematics Instruction
Instruction on relevant mathematical functions is to be provided under the appropriate subject areas rather than as a separate arithmetic course section. To assist instructors, however, all required real estate mathematics instruction is listed together in Section XXII of the Outline. Consideration was given to the amount of mathematics involved in each subject area when establishing the recommended number of instructional hours for subject areas. This integrated approach is recommended because it helps assure that students understand how various mathematical functions relate to the various areas of real estate practice. Instruction in basic mathematics concepts such as decimals, fractions, percentages, multiplication, division, etc. is not included in this course syllabus. Students deficient in basic math skills should be provided special assistance outside of class or directed to take a math refresher course.

Course Scheduling
Refer to Commission Rule 21 NCAC 58H .0404 for course scheduling parameters.

Instructional Materials
Some real estate textbooks and other required/recommended materials are described in the Bibliography that follows the Outline portion of this syllabus.
**Education Providers and Instructors**

Any company wishing to offer this course must be certified by the Commission as an Education Provider prior to commencement of any advertising for the course. Also, Prelicensing instructors must be approved by the Commission prior to commencement of the course. (See Commission Rules 58H .0200-.0404 for detailed information.)

**Course Completion Standards**

Course completion standards are described in Commission Rule 21 NCAC 58H .0207. *It is especially important that the Education Provider’s officials and instructors fully understand and strictly adhere to all the standards described in this rule.* Note especially the requirements for:

- at least 80% class attendance and
- a 75% minimum passing score on the end-of-course examination.

Education Providers and instructors are held accountable by the Commission for the performance of their students on the real estate license examination. It is essential that Education Providers and instructors establish and enforce course completion standards that are sufficiently high to assure that the performance of their students on the license examination is satisfactory.

**End-of-Course Examinations**

- *The Commission recommends that certified Education Providers and approved instructors use end-of-course examinations that are comprehensive in scope.*
- The minimum passing score required by rule on all end-of-course examinations is 75%.

**Syllabus Copies**

- The public may access this syllabus on the Commission website: [www.ncrec.gov](http://www.ncrec.gov)
- The course syllabus is provided free of charge by the NC Real Estate Commission.
- Education Providers/instructors may reproduce all or part of this syllabus for student use at their own expense, and may charge students for the cost of reproduction. A student syllabus is also available without instructor notes.
